

FQMS 2011-2012 TIP Summary

The FQMS English Team chose to focus on our overall scores on Quarterly Assessments as well as two student groups. For those targeted student groups, students in GT classes and students with IEPs, we have developed specific programs within the school day to support their progress. However, our team recognizes that while Assessments provide quick data, our content is just as much about writing/language as it is response to text. We've combined the data piece with our process writing to create two goals specific to the writing process. Students in each grade level will focus on growth in specific Traits of Writing as well as argument writing.
